

RADIADORES

Aluminum radiator

Principais Caraterísticas

- Color: White (RAL 9010);
- CE EN-442 certification;
- Maximum working pressure: 8bar;
- Maximum temperature: 120°C;
- 1" connections.

$L \times C \times A \times Coef = W$

W / Pstrength of Eelement to be taken into account $\Delta T=50^{\circ}C^{*} = N^{\circ}$ elements
Necessary

Descrição do Produto

Aluminum alloy radiator, which guarantees high quality and compliance, while also offering exceptional thermal conduction, strong mechanical strength, durability and corrosion resistance.

Modelos e Preços

Código	Modelo
0501-0401	Battery 4 Elements Radiator 600/100
0501-0402	Battery 5 Elements Radiator 600/100
0501-0403	Battery 6 Elements Radiator 600/100
0501-0404	Battery 7 Elements Radiator 600/100
0501-0405	Battery 8 Elements Radiator 600/100
0501-0406	Battery 9 Elements Radiator 600/100
0501-0407	Battery 10 Elements Radiator 600/100
0501-0408	Battery 11 Elements Radiator 600/100
0501-0409	Battery 12 Elements Radiator 600/100
